

Spanish Weekly Meal Planner

A group of 14 students from the 2nd year of Compulsory Education (13 years old) has been working for a month in this project, using part of their English lessons time.

They started by planning the meals and making a timetable in the classroom notice-board. From the beginning, they were very enthusiastic about everything concerning Erasmus + activities.

When the meal planner was decided, they searched on the Internet for pictures and printed them and their names. They enjoyed hanging up and seeing their work hung displaced on the wall.

Then, pictures were taken of the whole process and a powerpoint with the results has been created.

The other part of the project, recording a video of a typical Spanish dish, was done by three students in the house of one of them, because our school has no kitchen. They cooked a Spanish omelette.

We hope you enjoy watching the activities as much as we did while working on them...
